

Welcome!

This summer, your child has the opportunity to use Achieve3000® at home, the only solution that builds reading comprehension by meeting every child at his or her precise Lexile®/reading level and steadily moving them to grade-appropriate reading and beyond. Children using Achieve3000's programs (KidBiz3000®, TeenBiz3000®, and Empower3000®) participate in a 5-Step Literacy Routine designed to help children:

- develop reading strategies for informational text
- · build their academic vocabulary
- write both formally and informally
- · critically evaluate the information they read

This routine builds the skills children need to stay on track for college and career.

Making Reading Gains is as Easy as 1-2-3!

1. Improve Your Child's Comprehension with Achieve3000

- Spark discussions with your child about each lesson's reading topics.
- Ask your child to read articles to you and stop periodically to summarize or ask questions.
- Have your child write one question for each article and research answers together.
- Track your child's activity scores using the reports found in your Home Edition mailbox. Look for first-try scores of 75% or higher.

2. Motivate Your Child to Read More

- Show your child how to use the "Search" to find interesting Achieve3000 articles.
- Have your child fill out the "Summer Reading Chart" each time an article is read. Think about ewarding your child after articles and activities are completed at 75% or higher.
- Use your child's Lexile level (found in the reports in the Home Edition) to help find appropriately leveled books.

3. Activate your Achieve3000 Home Edition

- Promote your child's learning by activating your Achieve3000 Home Edition account.
- Watch this video to learn more about Achieve3000 and how to activate your Home Edition account.

Complete 40 lessons to make reading gains this summer!
